

Tips

to make your PPT slides

**dazzle, sizzle,
and influence**

your audience!

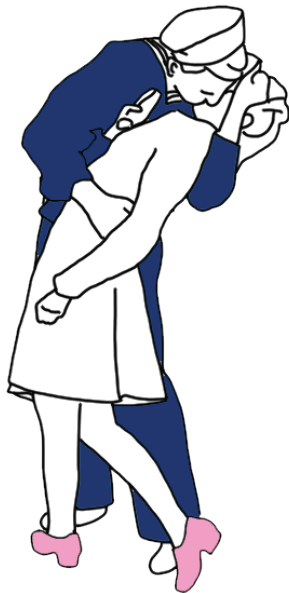

PPT slide Tip 1

K.I.S.S your slides

(KISS = Keep it Simple, Stup**)

Keep your slides as simple as possible. That means you remove all the nonsense that doesn't help the main message.

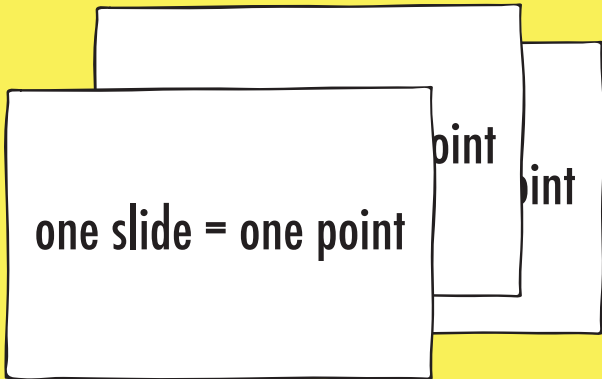

How do you know it's simple enough? When your 8 year old kid and 80 year old granny understand the slide without any explanation.

PPT slide Tip 2

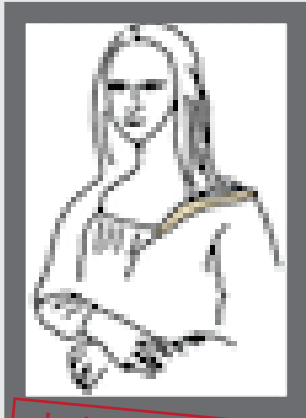

ONE point on ONE slide

This is a continuation of Tip 1 - KISS your slides and only one point on one slide. If you have more than one point, use another slide (not rocket science right?)

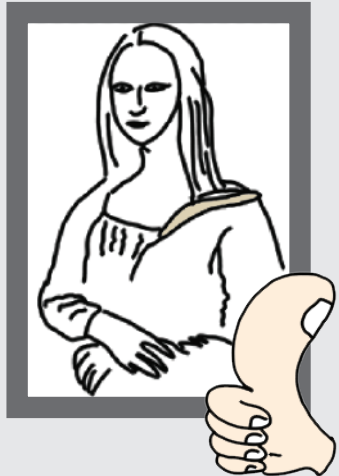

PPT slide Tip 3

Keep images super high quality

*this low quality image
is so distracting*

PPT slide Tip 4

Keep font size **BIG**

40 point

100 point

PPT slide Tip 4

K.I.S.S your slides again, especially technical ones

★ Extra Tip!!

YOU are the star of the presentation, not your PPT deck so remember that your slides are just an aid to help your audience remember your key points.

They came to listen to you. If you want them to just read stuff when you present, don't waste your time and just email the deck to them!
